

SANTIAGO UNO

GENERATING SOLUTIONS
FOR THE "LAST ONES"

ABOUT US

We develop several programmes to reintegrate young people with fewer opportunities into society via individual programmes with which they can choose their own way to rejoin themselves.

Our house aimed preferably at the "last ones" and those who understand that diversity enriches.

We contribute to a model of person who likes to do GOOD without conditions, who knows how to live in simplicity and austerity. Having obtained a true culture, they become socially committed, acquire responsibility at work and achieve a critical spirit.

We want that, having started from a disadvantaged situation, they integrate with dignity in society, without being ashamed of their origin, and becoming an active element to help other people who start from a similar situation.

Here we coexist, among others, a Christian and a Muslim community, sharing and enriching each other.

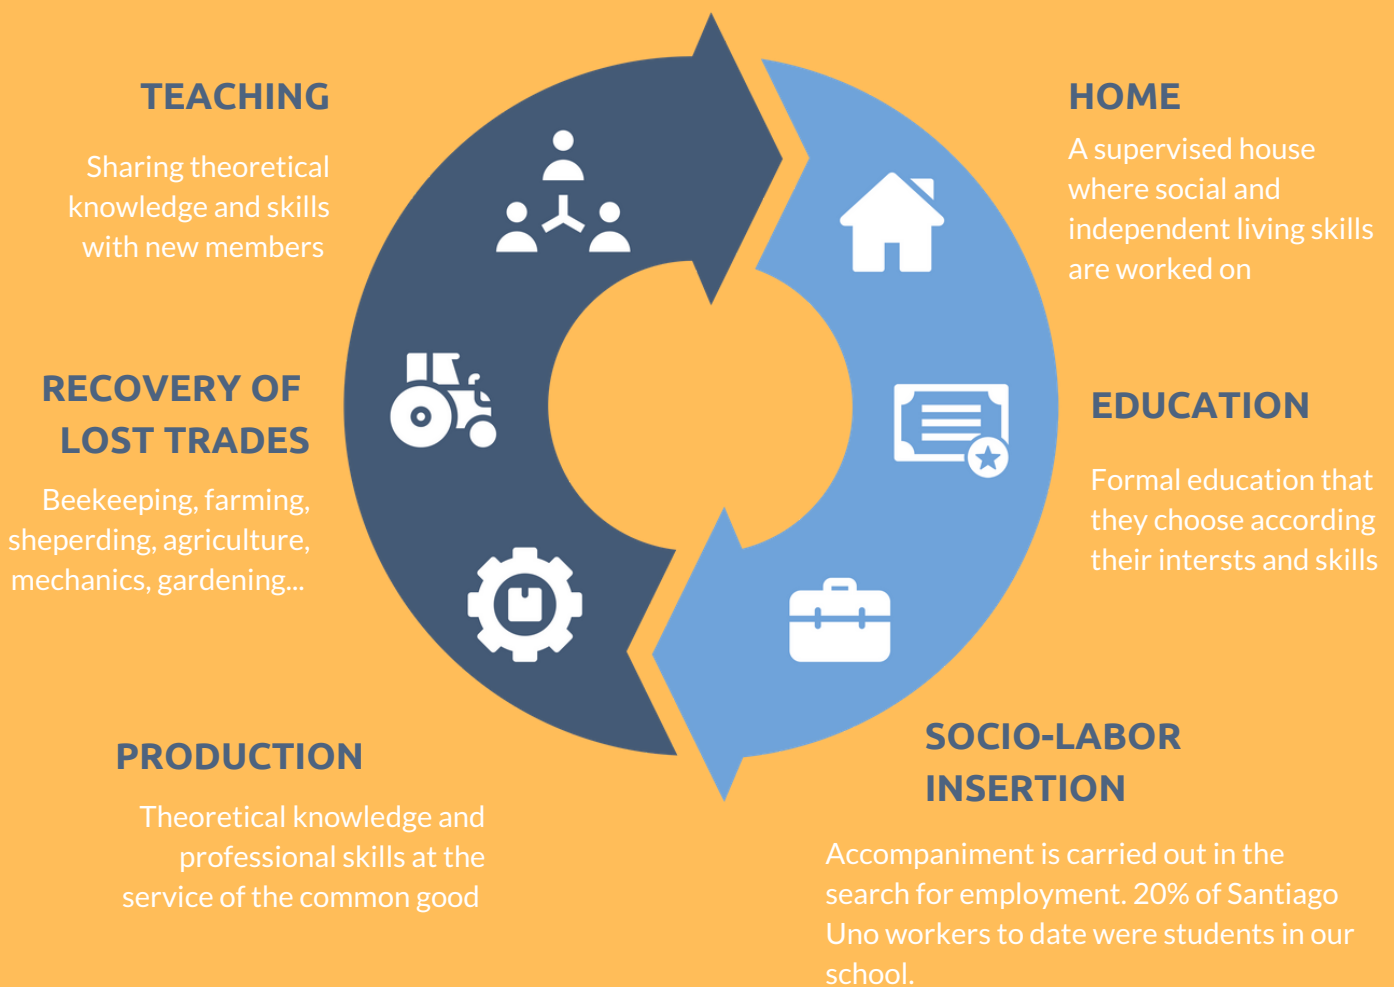

They believe in our methodology, and feel confident about it, therefore, 20% of workers to date were students in our school.

We manage 150 youngsters in our protected houses and our schools have more than 600 students.

CIRCULAR ECOSOCIAL ECONOMY PROJECT

What Santiago Uno provides...

What youngsters provides...

THE METHOD

This method designs a training path with which the youngsters can choose a trade which matches the most with their interests.

Each week, the youngsters that participate in this programme (mostly due to their impossibility to join a formal education at schools) try a new trade between the 20 different options Santiago 1 provide: welding, bird recovery, food gardening, apiculture, percussion, machinery, beauty, etc.

Once they choose the trade that links with their skills and interest, Santiago 1 offer them the tailored formal education via middle grade.

Besides, this method offers complimentary studies related to Environmental and Social Inclusion aiming at involving current students to help other youngsters.

Each young is accompanied by Santiago 1 team workers in their educational training programme aiming at getting some resilience and empowerment at two levels: at human beings and workers in a field they like the most. Called 'climb to success'.

RESULTS

+ 500 recovered birds

In our Enviromental Center

Proyect development

In bioconstructions, food gardening and kindergarten

Release of "Puentesan"

Cooperative farm where we produce +10k cheese from shepherding

Honey production

From our hives

Wine and Olive Oil

Self-production

Recovery

Of lost trades

COMPLEMENTARY ACTIVITIES

We are currently developing a bunch of projects in liaison with the youngsters participating in our programme. These are the most important in terms of development aid:

'Llenando Escuelas' (Morocco). Summer Camp where participants live in some Berber communities helping in building their houses.

'Puente a Capiatá' (Paraguay). Clothing drive action based in Salamanca (Spain) with which we send clothes and food to 1.5k children with fewer opportunities in Paraguay.

NON FORMAL EDUCATION

We launched several center arts e.g circus school, film center, leisure-time entertainment and sports championships aiming at avoiding them to relapse into bad habits.
